## To Customers

### Silicone free products

Dear Sir or Madam.

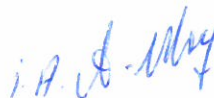

We confirm that OBO Bettermann articles are not produced with silicone containing substances. Also there is no contact to silicone containing products.

**Restriction:** If there are silicone concentrations greater than 10E-10, products cannot be classified as silicone free. Wetting problems will occur with low amounts of silicone present.  
OBO Bettermann cannot exclude direct or indirect contamination by silicone if articles get into contact with for example deodorant, hairspray, hand lotion, hair shampoo etc..  
Indefinite silicone concentrations resulting from circumstances beyond our control are not excluded.

For any further question, please contact us.

Best regards
